# Susana Mariaca

## ABOUT ME

Junior Data Analyst with a strong scientific background and experience in data cleaning, statistical analysis, and data visualization. Skilled in using R, Power BI, and basic SQL and Python to analyze datasets, generate insights, and communicate results through clear reports and visualizations. Background in environmental data analysis and research-based projects.

## EXPERIENCE

### 2025    Proyectos SUMA S.A.S

Environmental Consultant

- Analyzed spatial and environmental datasets related to ecological connectivity.
- Used GIS tools (ArcGIS) to analyze and interpret spatial data.
- Calculated environmental indicators and summarized results.
- Developed technical reports with data-driven conclusions and recommendations.

### 2022    CES University

Researcher

- Designed and prepared experimental datasets with multiple treatments and replicates.
- Cleaned, organized, and analyzed data using R / RStudio.
- Performed statistical analysis to compare results across treatments.
- Visualized findings and summarized insights in a technical report.
- Communicated results clearly through a structured final report.
